SMART CHAIN
Blockchain Technology

Built on the CORE Blockchain

CORESAGE
SMART CONTRACT

Protocol Overview

CoreSage is an autonomous smart contract protocol deployed on the **CORE** blockchain. It operates entirely on-chain, enforcing participation rules, matrix placements, and reward distribution strictly through immutable smart contract logic. There is no admin control, no manual pay outs, and no centralized intervention.

CORESAGE
SMART CONTRACT

Key Architecture

CoreSage runs a dual-matrix system:
- X3 Matrix.
- X6 Matrix.

Each matrix operates across 12 progressive levels, allowing participants to scale participation and earning eligibility over time.

All actions are:
- Transparent.
- Atomic.
- Verifiable on-chain.

CORESAGE
SMART CONTRACT

Registration & Activation

To participate in CoreSage:

- A user must register using an existing referrer.
- Registration automatically activates Level 1 in both X3 and X6.
- All activations are processed atomically on-chain.
- Rewards are distributed instantly by the smart contract.
- There are no admins, no approvals, and no manual withdrawals.

CORESAGE
SMART CONTRACT

CoreSage uses a fixed, progressive level system. Each level doubles in value, and users must activate higher levels to remain eligible for matrix placements and rewards.

Level Progression Structure

Level	Cost (CORE)
Level 1	Unlocked
Level 2	60
Level 3	120
Level 4	240
Level 5	480
Level 6	960
Level 7	1,920
Level 8	3,840
Level 9	7,680
Level 10	15,360
Level 11	30,720
Level 12	61,440

CORESAGE
SMART CONTRACT

X3 Matrix

Direct Referral Structure

Structure:
1 × 3 matrix (you + 3 direct positions)

How It Works:
- Every direct referral fills one slot
- The first two positions pay you directly
- The third position triggers an automatic cycle
  - Payment is routed to your sponsor
  - Your matrix reinvests and reopensKey

Characteristics:
- Fully direct effort-based
- Automatic reinvestment
- No missed or delayed payments

Best For:
- Users focused on direct referrals and fast cycles.

CORESAGE
SMART CONTRACT
X6 Matrix

Structure:
- 2 × 3 matrix (two rows, six total positions)

How It Works:
- First row (2 positions):
  - Payments flow to your sponsor (spillover)
- Second row (4 positions):
  - Payments flow directly to you

Earning Sources:
- Your direct referrals
- Spillover from upline activity
- Team expansion below you

Key Characteristics:
- Encourages teamwork
- Allows passive income via spillover
- Rewards long-term participation

X3 vs X6

3 ⚖ 6

Breakdown

3 Matrix

- You earn from your first 2 direct referrals
- The 3rd referral pays your sponsor
- Fast cycles, direct focus

X6 Matrix

- You earn from 4 second-row members
- First 2 positions pay your sponsor
- Strong passive and team-based earning

CORESAGE
SMART CONTRACT

Reward Pool Mechanics

In addition to matrix earnings, CoreSage includes a protocol reward pool.

- A fixed portion of all protocol activity feeds the pool.
- Each user accumulates a score.
  - Based on referrals.
  - Based on active levels.
- Pool rewards are claimed proportionally to score.

Sustainability Controls

- Claims are time-gated
- Prevents rapid depletion
- Encourages long-term engagement

CORESAGE
SMART CONTRACT

Core Principles
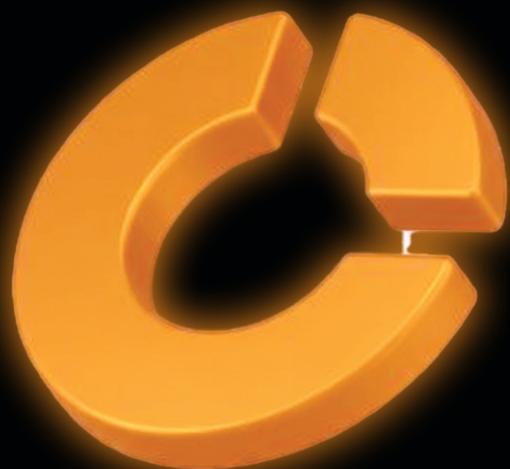

- Fully decentralized execution
- Immutable smart contract logic
- No human control
- Transparent reward distribution
- Automated reinvestment
- Predictable level economics

Summary

3 ways to earn on CoreSage

- Through the X3 matrix
  Earn from direct referrals, with automatic cycling.

- Through the X6 matrix
  Earn from team growth and spillover.

- Through the global pool
  (for referrals and non-referrals)
  Earn from the shared reward pool based on activity and score.
